

POSTGRADUATE EDUCATION

# MSc ECONOMICS

## Master of Science in Economics

SCHOOL OF MANAGEMENT AND SOCIAL SCIENCES (SMSS)  
PAN-ATLANTIC UNIVERSITY

The M.Sc. Economics programme provides rigorous training on core areas of economics that will equip students for the world of work in government, international organizations, economic institutions and academics.

The programme is intended to provide a solid foundation of knowledge and skills needed to understand and make contributions to the development of Nigeria and the global community through a thorough understanding of the workings of an economy and the constructive use of that knowledge in a range of settings.

Emphasis will be given to the development of critical thinking, deductive and inductive reasoning skills. Graduates will be able to abstract, using simplified models that identify the essence of a problem, to analyze and reason – both inductively and deductively, to marshal evidence, to assimilate structure and analyze quantitative and qualitative data, to communicate concisely the results to a wide audience, including those with no training in Economics, and to think of the limits of one's analysis in a broader socio-economic context.

They will have the ability to draw economic policy inferences and to recognize the potential constraints to their implementation. They will acquire a capacity for ethical and competent professional performance.
